

STARVATION IN AFRICA

Why do they starve in africa:

The main problem that caused the hunger in Africa is change of climate that destroyed farming in east Africa. It killed the animals and prices of the food were rising and are still rising. So the food is getting unavailbe for people in east africa.

Meanwhile in Europe we have other problem. We are throwing more and more food in the garbage.

In one year we threw 20 million tons of food.

Monke poopinator:

So its machine that is farming monkeys poop. We got one monke with phone that is pooping. The poop travels to the donation house and our worker packs the poop and gives it to the customer.

Monkeys poop are very healthy for your body. It has alot of vitamins and proteins.
